OLABISI SAMUEL

SOFTWARE ENGINEER | BACKEND SYSTEMS & FINTECH

United Kingdom | +447848166849 | samsamlux2016@gmail.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software engineer working across fintech applications, backend APIs, third-party integrations and frontend development. Since 2024, contributing to FlurryPay's financial-product workflows, production troubleshooting and application delivery. Also building Univa and UnivaPay, combining hands-on product development with experience supporting live systems and real users.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL

Backend & Data: Node.js, NestJS, Express, REST APIs, PostgreSQL, relational databases

Frontend & Mobile: React Native, Expo, Expo Router, Redux Toolkit, NativeWind

Other: Third-party API integrations, payment workflows, authentication, debugging, deployment

PROFESSIONAL EXPERIENCE

FlurryNetwork Technologies (FlurryPay) — Software Engineer / Full-Stack Engineer 2024–Present

- Develop and maintain application features, backend services and APIs supporting fintech operations.
- Work with financial-service integrations and transaction-related workflows, including provider errors and operational constraints.
- Investigate production issues across application, backend and third-party service layers; implement and support fixes.
- Translate product and operational requirements into technical changes and support application releases.

Zeno NG — Frontend Developer 2023–2024

- Built and refined application interfaces and client-side functionality.
- Integrated frontend components with backend APIs and collaborated on feature delivery.

SQI College of ICT — Software Engineering Instructor (Internship) 2022–2023

- Supported software engineering instruction and practical programming exercises.
- Guided learners through development concepts and hands-on technical tasks.

SELECTED PRODUCTS

Univa — Builder / Technical Lead

- Building a student platform for course materials, notes, timetables, announcements and campus commerce.
- Working across mobile development, backend integrations, deployment and product improvements.

UnivaPay — Builder / Technical Lead

- Building payment and dues-management workflows for student organisations and campus groups.
- Working on payment-provider integrations, transaction flows and operational troubleshooting.

EDUCATION

SQI College of ICT Software Engineering Studies
